Description

Connection Technology Systems (CTS) IPS-3110 series Industrial PoE Switch are the Fast&Gigabit Ethernet 10/100/1000Base-T to 100/1000Base-X Industrial PoE Switch. It switches the traditionally twisted-pair RJ-45 cable into various fiber optics media. IPS-3110 series offer easy management of uplink port (10/100/1000Mbps RJ-45 + 100/1000 SFP slot). The fiber optical port of IPS-3110 series can support various connection distances via multi-mode fiber, single-mode fiber or Bi-directional single-mode fiber for the deployment to the control room, warehouse, or factory.

The IPS-3110 Industrial PoE Switch series are designed for deployment at industrial sites. With DIN-rail mounting, you can easily mount the Industrial PoE Switch at your sites such as factory or warehouse. The two Terminal Blocks can provide power redundancy to prevent any possible power outage and digital output to serve as an alarm.

The IPS-3110 Industrial PoE Switch series provide perfect solution for delivering power over Ethernet for IP cameras, WiFi access points or IP phones at an extended operating temperature (-40°C ~ 75°C) to withstand against harsh environment for better performance. IPS-3110 series are fully compliant with IEEE standards such as IEEE802.3/802.3u/802.3ab/802.3az to ensure interoperability between network devices.

The IPS-3110 Industrial PoE Switch series provide easy management ways via telnet CLI and SNMP. To fulfill the requirement of mass deployment, the device also supports DHCP auto-provision mechanism to allow the network administrator to manage the device configuration automatically and dynamically.
