6 / 8 Port Gigabit Ethernet Switch with PoE+ optional with 2x SFP Slots

## Description

Unmanaged Industrial PoE Ethernet switch with P.S.E. function. The MS655203PX switch supports Power-overEthernet, a solution to transmit electrical power, along with data to end devices over standard twisted-pair cable in an Ethernet network. The switch has $4 \times 10 / 100 / 1000$ Base-T P.S.E. (Power Sourcing Equipment) ports, $1 \times 10 / 100 / 1000$ Base-T or 1000X SFP Combo port and $1 \times 1000$ Base-X SFP port. The optical network speed can be set by changing the settings of the DIP-Switch. The wide operating temperature range from -40 to $75^{\circ} \mathrm{C}$ can satisfy most of operating environment. Therefore, the switch is one of the most reliable choices for PoE Ethernet application.

The MS655203PX switch can be used in connecting several PoE P.D. Ethernet devices like IP-Camera, Access Points or other Ethernet devices. In addition, there are two different power inputs at terminal block to avoid interruption caused by power down. When the primary DC power input fails, the backup power input will take over immediately to guarantee a non-stop operation.

## Properties

- Gigabit Performance for Industrial Ethernet
- $4 \times 10 / 100 / 1000$ Base-T PoE+ up to 30 Watts per port 1x 10/100/1000Base-T or 100/1000X SFP Combo port 1x 100/1000X SFP-Slot for fiber uplinks
- optional $8 \times 10 / 100 / 1000$ Base-T PoE+ version
- Dual DC-Inputs $48 . .56$ VDC
- Monitoring with potential free relay contact
- Cost effective and compact design
- Ruggedized IP-30 housing design
